

## AI for Design

### Overview

This introductory course in AI introduces graphic designers to ComfyUI, a powerful node-based interface for AI image generation. It empowers students with the skills to build workflows, write structured prompts, and use AI to enhance visual design, product mockups, and storytelling.

**Duration:** 11 Classes / once per week

### Contents

#### **Class 1 Introduction**

- Intro To Comfyui
- Node Based workflow logic

#### **Class 2 Prompting**

- Prompt Engineering
- Negative Prompting

#### **Class 3 Model and Checkpoint Management**

#### **Class 4 Workflow**

- Building Workflow
- Controlling and condition Nodes

#### **Class 5 Image Editing**

- Masking and In-painting
- Image Upscaling

**Class 6 Product Integration**

**Class 7 Visual Style Consistency**

**Class 8 Workflow Templates & Re-usability**

**Class 9-11 Final Project**

- Final project modeling feedback
- Project texturing and shading feedback
- Lighting and finalizing feedback

**Grades**

Grades will be mainly focused on discussions, practical exercises, and case studies.

**Attendance**

It is expected to be attending in the class the whole course however one absence only is allowed.
